8. Comments.
Was no into accounting at all and never thought I would be before this course. I love the way professor taught us and I was constantly challenging by brain, and expanding my knowledge. I love this class, my favorite I have taken so far for sure
He's the best instructor ever! He really makes sure that we understand the material and encourage us to come to office hours if we still have trouble understanding. He engages with the class to keep us on track.
Abhi is great! He cares for the overall being of his students. He makes it known that you can go to him for additional support outside of the classroom if you are falling behind. His class is big, yet he makes it a comfortable environment to ask questions freely.
I really enjoyed this class. This was a class i looked forward to every Tuesday and Thursday. The energy in class is always great and Abhi really tries his best to make sure that we are all understanding the concepts. The examples he uses are very helpful in helping me understand the concept. The energy in the class is always so positive and he really listens to his students.
the best instructor i have ever had at UH manoa. he checks all the boxes! amazing amazing amazing
This course was one of my favorite classes at UH. It was both educational and intellectually challenging in a good way, and professor Abhi was willing to answer all our questions at any time and communicated with us very well.
Abhi was a great professor. I was scared of doing accounting, but he made it extremely manageable and interesting. I think I performed well in this class because of him. I think the exams are the right amount of difficult, and the class quizzes kept me on my toes and also made sure I attended class. I would recommend him to anyone.
no comments other than it's a hard class lots of word problems
I thought Professor Abhishek was a really good professor. He tries his hardest to make sure everyone in the class understands the materials and really wants every to try to learn and do their best in the class. I really like all of the different methods he tries to use to get the class to understand concepts. He is always a really nice and funny guy and is always available and respectful when we reach out to him.
Teaches concepts in real life situations which helps students understand. Connects with students well.
The pop quizzes were not fun.
I'm glad Abhi was my professor for my introduction to accounting. He cared about trying to set everyone up for success. Quite frankly he's one of the best professors I've ever had.
It's a very difficult course, but I liked how he took our thoughts into account and used it to improve the class. I learned a lot and was definitely challenged more than any other class thus far.
I liked the way her formatted the class and although I was challenged intellectually, he helped out me and everyone around me.
Abhi is one of the best teachers I've had so far at UH. You can really tell he cares about each and every one of his students and does everything he can to help us succeed. I really appreciate him because I failed ACC200 last semester with a different professor and am taking it now with Abhi. I know that I will pass this time because his teaching methods make the material easy to understand, unlike some professors.
Out of all the professors I've had so far, very little actually compared to professor Abhi. Every class he showed his determination, and focus to teach us the content in a way that was fully understood and made sure we knew that as well as he always encouraged students to keep asking questions till they understood the material being taught. He'd go extra lengths to ensure that students would also be able to fully grasp what was being presented through extra materials, and examples. On top of all that he'd take the extra length to ask students what was and wasn't working in the class to better teach everyone in a way that worked best. So that's really why I feel that if you have an award for best accounting professor, give it to him, because out of all the things that actually thought he did well that I don't feel many other professors show through their actions and demeanor was that he put the students first, and always made sure that the students in the class were learning and had all the resources available to actually succeed. So if anyone failed that class it'd be entirely on them because professor Abhi made it inherently clear he'd want everyone to excel in the class.
This professor is incredibly passionate about the class content that it makes the course easy to be enjoyable. He educates us on the subject using modern real-life examples which then helps us be more engaged and passionate as well. He is understanding and is easy to adjust his teaching styles, adapting to each specific students preferred style. The professor truly believes in all the students and makes it clear to the entire classroom that if we have questions or concerns, to reach out and he will provide as much understanding on the subject as possible.
Professor Ramchandani is one of the most knowledgeable instructors I have ever been in a course with. I am coming in with very little prior knowledge, and he has done an excellent job of explaining the course and its concepts to me. He has always been available for questions, and has made me be excited to come to class and learn more.
Fantastic and patient instruction. Listens to students and feedback possibly too much
This professor made me love accounting! He made a difficult class easier to understand and inviting to ask questions. He always kept up with e-mail's and other concerns from students and provided ample time for students to do everything they need to pass this class.
This was a great course, personally one of my favorites. The instructor cares about the students and wants you to learn from them. He is great with class interactions and I'm sure other students in my section can agree.
